Note 1: Approved at the 2nd General Education Committee Meeting of the Spring semester, Academic Year 2024.

Note 2: Selective Requirement – Students must complete at least two Core General Education courses from two different fields among Humanities, Social Sciences, and Natural Sciences.

Note 3: Informatics and Computing Field – Students may take any General Education course in this field; however, its Core General Education courses do not count toward the selective requirement mentioned in Note 2. For students in the following departments/programs: Department of Statistics, Department of Information Management, Department of Land Economics (Land Surveying and Information Division), Department of Applied Mathematics, Department of Computer Science, and the International College of Innovation – the required credits in the Informatics and Computing Field range from 0 to 3 credits.

Note 4: The total number of General Education credits required for graduation is 28 credits. Any credits beyond this total—including excess credits in any single field—will not be counted toward the graduation requirement.
